

Sprayable Solid Surface

Versatile. Durable.

Sprayable Solid Surface (SSS) can dramatically enhance almost any surface with spectacular granite colors and textures. With almost unlimited application potential it can be used on our showers, tubs, wall surrounds and accessories. The possibilities are expansive.

Free of hazardous pigments and additives, this surface uses the finest raw materials under a patented process. The granules are a polyester compound, incorporating pure alumina tri-hydrate into the particles. SSS is UV resistant, fire resistant, chemical and stain resistant.

Looking for something a little different? SSS is available in extensive color combinations. Our library of colors might already match what you're looking for.

Our commitment to offering high quality, innovative products with the latest technology, results in bathing units of unsurpassed beauty and durability.

Sprayable Solid Surface

Classic Design Series

Just as natural granite is made of grains from fine to course in appearance, Sprayable Solid Surface is as well. Sprayable Solid Surface is divided into two series – the Classic Design Series and the Premium Design Series. The Classic Design Series offers chips from fine to medium, while the Premium Design Series offers a mix of all chip sizes, including coarse. Regardless of the series, there are a wide variety of blends to select from.
